

CARBO™ **MEDALIST**®

WE'VE MADE IT EASY TO WIN CUSTOMER, MANAGEMENT, AND EMPLOYEE LOYALTY

It's a balancing act, trying to achieve productivity and employee comfort and safety goals – while exceeding customers' expectations with quality finished products. Carborundum Medalist flap discs, now with 100% ceramic grain, get your metalworking jobs done right. You get a flap disc that works quicker and longer under the toughest conditions, for added production, labor, and inventory savings, and ensures quality from start to finish without gouging or leaving cutting patterns.

Key Materials/Markets:

Mild Carbon Steel,
Ferrous Metals, and Cast Iron
MRO, Metal Fabrication,
and Welding

- Achieve an exceptionally fast cut rate and long product life from our new super sharp, 100% ceramic grain that defies premature dulling with optimum resistance to wear
- Eliminate burn (with our grinding aid lubricant) and produce excellent part finishes that competitive blocky grains cannot deliver
- Gain life and performance from our new, stronger, thicker engineered, Y-weight Plus polyester flaps
- Increase amount of usable flaps from our quick-trim plastic backing that wears away with our self-sharpening abrasive
- Grind and finish at the same time; no switching from depressed center discs to resin fiber discs
- No more changing over slow-grinding, fast-wearing discs; simply get to the task at hand so your production times turn into profit lines
- Get the same quality results on mild carbon steel, ferrous metals and cast iron applications that you expect, with less pressure – as a result of enhanced grain/bond adhesion, and a more forgiving, cooler cut that operators prefer
- Choose these environmentally-stable flap discs with the lowest formaldehydes and no performance-inhibiting dies that are safer for your operators' use
- At the end of the day, the finish has to be consistent and meet the quality expectations of your customers. It's a win-win with Carbo Medalist YP 2788 R flap discs
