

# CARBO™ FIBRATEx®

## THIN AND FLEXIBLE HIGH PERFORMANCE HAND PADS PERFECT FOR TIGHT SPOTS AND CONTOURS

Achieve an amazingly fast cut and definitively better finish than competing pads, across a variety of industrial markets, where high performance and maximum productivity are standard operating procedure.

- Extremely thin and conformable; ideal for cleaning, blending, finishing and deburring contoured surfaces and tight spaces
- Special coated web design for superior and constant cutting action without added effort from user
- Advanced web design enhances durability for increased product life
- Excellent alternative to conventional abrasive hand pads when controlling time and cost are key
- Versatile; ideal for woodworking, metalworking, maintenance operations, and synthetics fabrication
